As developments continue to proliferate throughout KL, high-rise, high-tech buildings are quickly taking centre stage. But today's homeowners are on the lookout for something a little more substantial than just another shiny skyscraper; namely, thoughtful architecture that complements its surroundings and improves the wellbeing of its residents. Enter 8 Conlay.

Merging boundary-pushing architecture with modern interior design, this unique mixed-use development by KSK Land comprises two towers devoted to its signature [YOO8 residences](#) serviced by Kempinski and one tower housing the world-class five star [Kempinski hotel](#), Europe's oldest and most established luxury hotel group.

At once sleek and intimate, the YOO8 residences embody the perfect mix of city and nature, work and rest. Designed by award-winning architect and designer Steve Leung in collaboration with YOO design studio, the residences' pleasing blend of textures, warm tones and clean lines complement the starkly modern architecture. Its impressive design is further substantiated by the development's strategic location on Jalan Conlay which draws much from KL's buzzing downtown core. Slated for completion in 2020, 8 Conlay is poised to thrill, as an arresting addition to the city skyline.
